FYP improvement points:

1) conversation without summary is not getting added !
2) no back button on /ar page to get back to home
3) issue of last converation card on screen

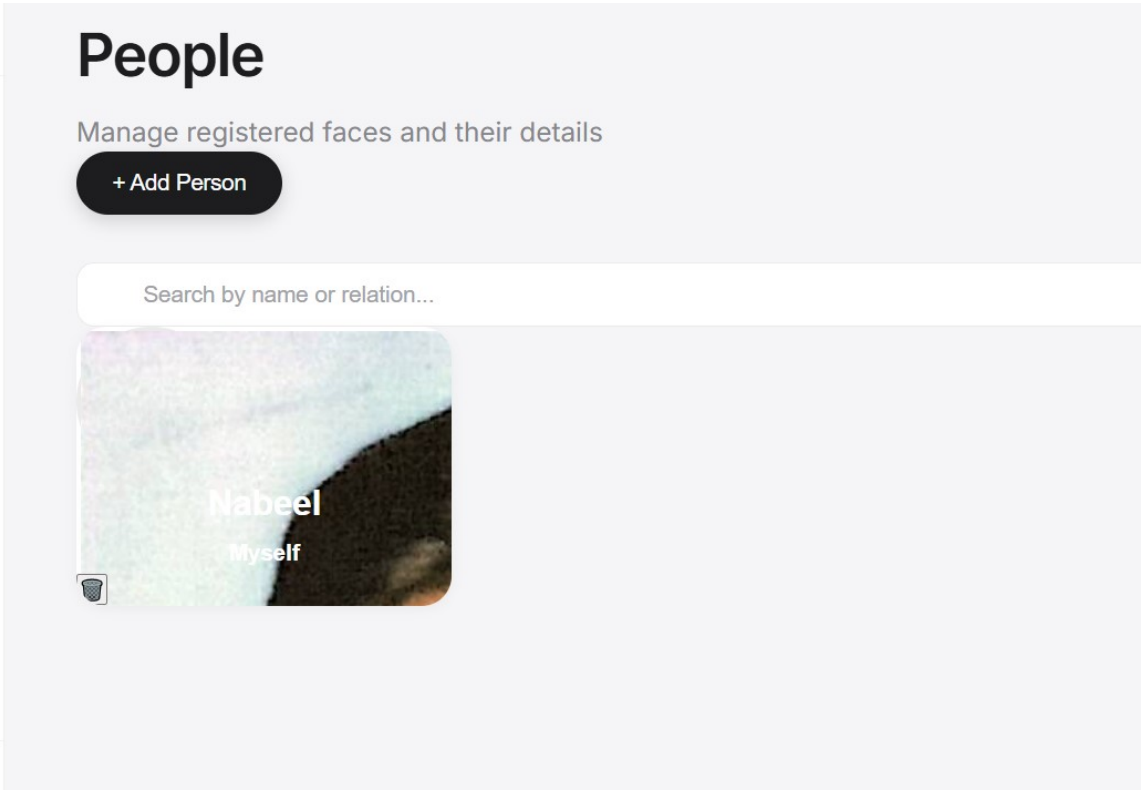

it should have somemargin from the right side , it should not touch get out of the right side as it is right now ,

it should ba a small box as it and user can open it to show complete conversation which is

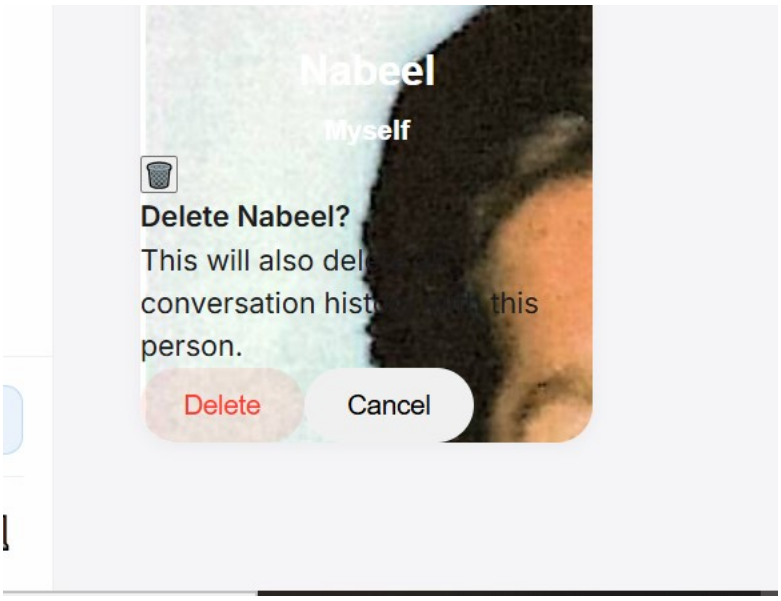

recently saved after clicking it

4) this card on people page should show proper saved photo in the card , right now there is issue in it

5) the onboarding is not showing all the steps properly , only till 7 steps with correct pages and positions are showing , also agar user saath saath guide ko fllow krna chahy to aesa kuch bhi nhi he abhi , isko proper krna he , k user saath saath action peform kry , or agar user skip

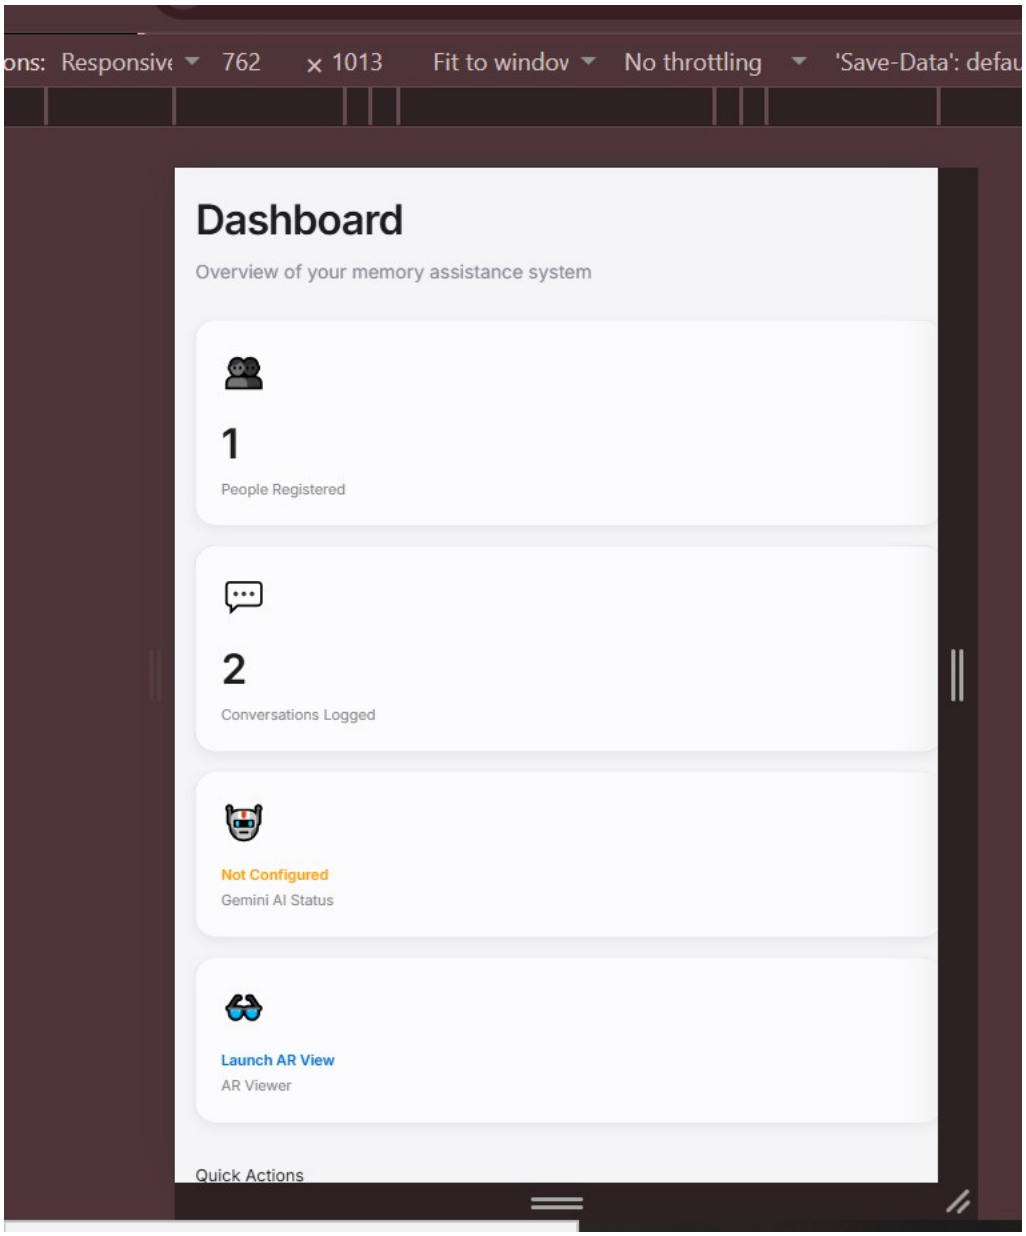

6) trash icon issue in card on people page

card ache se se show ho , lucid icons se lelo ya react icons se , or aagy ka text ek pop up me aae

mobile screen points:

1) for mobile screen there is no side bar for navigation to other pages , so fix that thing with with a menu icon to open side bar

also we have to check all the pages on mobile screen and fix responsiveness if any page is lacking right now
